#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 3 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,507,337 (Sato et al.).

Sato teaches a touch panel comprising a first light transmitting sheet (20) comprising a first electrical conductive layer comprising a conductive metal oxide (25), a conductive layer forming member (23) comprising a polycarbonate base resin (first light transmitting layer), a bond layer made of a rubber base adhesive (27) (rubber elastic layer adhesive) and a supporting member (22) comprising made of a glass substrate or transparent sheet (second light transmitting film) which is comprises a hard coat layer (21) on the opposite side (See figure 2 and col. 9, lines 10-13, col. 8, lines 52-56 and column 7, lines 37-47). Sato further teaches that the first light transmitting sheet (20) is stuck to a second light transmitting layer (10) (light transmitting

Application/Control Number: 10/625,598

Art Unit: 1775

substrate) where the second light transmitting sheet has a second electrical conductive layer (14) and wherein the first light transmitting sheet confronts the second electrical conductive layer at a predetermined distance (See Figure 2). Sato still further teaches that the thickness of the conductive layer forming member (first light transmitting layer) is 100 microns (See column 10, lines 34-41).

## Allowable Subject Matter

- 3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 4. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or suggest the claimed transparent touch panel wherein the adhesive layer is made of a silicone rubber having: a) hardness of 10-70 (condition of measurement: scale A of Rockwell hardness test in Japanese Industrial Standards); b) a compressive permanent distortion factor of 50 % or less (condition of measurement: 70 degrees C 22 hours of B method in American Society for Testing and Material); c) total light transmittance of 90% or more; and d) a thickness of 5 gm or more.

#### Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Stein whose telephone number is 572-272-1544. The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 5:00 p.m. If the attempts to reach the examiner are unsuccessful, the examiner's supervisor, Deborah Jones can be reached by dialing 571-272-1535. The official fax number is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
